Millwright Accelerated Training

GET A HEAD START ON YOUR CAREER

Louisiana Needs You

The NCCER Millwright Training is a program that prepares participants to install, align, and trouble shoot machinery in factories, power plants, and other industrial sites. They install conveyor systems, connect machinery to power supplies and piping, direct hoisting and setting of machines and adjust the moving and stationary parts of machines to certain specifications. Through this training, individuals will have the opportunity to gain entry level skills and certification to enter the Millwright industry.
